\*Cropped Images in the “projected designs” folder

News: I’d like to keep it in a concise manner so I’d be making it a page without links to more info unless a link is provided in the data.json.

<https://www.templatemonster.com/demo/57218.html>

Events: Sorting these by date shouldn’t be an issue if I can remember how to... sort things by date but another concise page. <https://www.templatemonster.com/demo/54151.html>

Contact: Because the data.json states that there are only images, names, and positions, I plan to overlay the images with the text and position of the bandmates.

<https://www.templatemonster.com/demo/55381.html>

About: It’s an about page, not much to really do here.
